PASSION, KNOWLEDGE AND DESIGN PRINCIPLE

Performance without compromise: featuring a stylish contemporary shell with beautiful clean lines and a marine stainless steel frontage. DELIVITA quality craftsmanship offers durability and weather resilience for many years of fabulous food.

The oven is a combination of modern technology with an artisan interior and features a deep refractory stone base. The interior comprises a handcrafted clay-composite, encased in high-tech insulation and a thick polished fibreglass shell, available in a range of beautiful colours to enhance any outdoor kitchen with its designer appeal.

With maximum fuel eco-efficiency and featuring a unique design, heat radiates perfectly within the oven, allowing the stone base to cook from below ensuring the perfect crunch. The rolling flames above infuses food with delicious wood-fired flavours.
