DURABLE DESIGN

TRIMM Copenhagen is in it for the long haul. We believe that furniture and interior products should live a long and useful life. That is why durability and sustainability are some of the key factors in the design process. This can be seen in the choice of high-quality, incredibly durable materials, produced in the EU. But also in terms of a timeless design that can withstand everchanging trends and tendencies.

TRIMM Copenhagen wants to give people a feeling well being and make their lives easier. We want to create a space that heightens the quality of life, and that focuses on relaxation and togetherness, without compromising on a beautiful design or comfort.

OUTDOOR COLLECTION

TRIMM Copenhagen has 12 years of experience in outdoor lounge seating. We use special durable fabric from the maritime industry that can withstand UV, mold, saltwater and pool environment, and is water-repellent. The filling used; EPS beads (25% regrated, 75% virgin) is mold-resistant. All metal frames are KTL/E-coated for extra rust protection. If a product gets damaged, it is possible to purchase a fabric repairkit and a paint repairkit.

Warehouse and production in the EU (Poland)

Outdoor Fabric: Sunbrella Plus®

Name: Sunbrella Plus

Composition: 100% Acrylic

Production: Woven

Finish: resin based anti-fungi coating, water and UV resistant.

Abrasion resistance: No data

Lightfastness outdoor: 4-5

Color fastness UV ISO 105 B02: 7/8

Oil-repellent properties ISO 14419: 5/8

Schmerber ISO811: 1000 mm

Production country: France

Certification: meet EU regulation 2018/1513 not containing PFOA/PFOS

GENERAL CLEANING INSTRUCTIONS

Sunbrella Plus® & Sunbrella In&Out

- First brush off loose dirt.
- Hose down fabric thoroughly. Water should be cold to lukewarm and never more than 100°F/38°C.
- Prepare a cleaning solution of water and mild soap (No detergents).
- Use a soft bristle brush to clean. Allow cleaning solution to soak into the fabric.
- Be sure to rinse thoroughly to remove all soap residue.
- Allow Sunbrella to air dry only. Never apply heat to Sunbrella fabrics.

DEEP OR STUBBORN STAIN CLEANING

Sunbrella Plus®

If stubborn stains or mildew persist, you can use a diluted chlorine bleach/soap mixture for spot cleaning. Protect the area around the Sunbrella fabric when using a bleach solution – bleach may discolor non-Sunbrella fabrics. Always rinse Sunbrella thoroughly to completely remove bleach.

HAND WASH: Mix 100 ml chlorine bleach with 50 ml of mild soap and one 4 l of water. Clean with a soft bristle brush. Allow mixture to soak into the fabric for up to 15 minutes. Rinse thoroughly until all soap residue is removed. Allow to air dry. Repeat if necessary.

CUSTOM COLORS

Products can be ordered in a custom color if indicated on the product page. The delivery time is typically 5-6 weeks and there is a fixed color-changing fee pr. color. Samples of textiles and colours can be sent upon request. Remember to notify us about the desired color when ordering.

FR COLLECTION

FR Fabric: Sunbrella NATTE

Name: NATTE

Composition: 100% Acrylic

Production: Woven

TRIMM COPENHAGEN VALUE CHAIN

TRIMM Copenhagen is constantly working to become more sustainable in all parts of the value chain. Every time a choice is made, the climate and environmental impact is an essential part of the process. Read more about the specific initiatives TRIMM Copenhagen has taken and how sustainability is considered in daily operations.

Design

One of the most important factors for a product's longevity, besides durability, is its visual expression and style. For TRIMM Copenhagen, the goal is therefore always to create something that feels timeless, but at the same time is modern and relevant. Working with solid, round shapes and base colors that can withstand ever-changing trends and tendencies. For example, one can still find many of the same bestsellers from the company's start-up over 10 years ago in the range today. When TRIMM Copenhagen launches a new product, it is therefore also the hope that the product will still be found in many homes in 30, 40 or 50 years.

Materials

For TRIMM Copenhagen, the choice of material is absolutely fundamental for product development and identity as a design company. In addition to going for high quality, priority is also given to materials with high durability and the possibility of using the material again and again for new purposes.

In recent years, TRIMM Copenhagen has also begun to choose materials that have had a life before or in some other way to have little or no harmful effects on the climate and the environment. This can be seen in the Recycled NOAH Collection from 2021, which is made of a zero-waste textile, created from 100% recycled plastic bottles and polyester waste, and in the filling for all beanbags, which now consists of 25% recycled EPS.

Production

For TRIMM Copenhagen, it is important to work closely with production and minimize all unnecessary transport. That is why all our products (with the exception of the Terrazzo tray, which are handmade in Vietnam) are produced in the EU. There is daily contact with the production and visits to suppliers at least once a year.

Transport

One of the biggest initiatives TRIMM Copenhagen has taken in relation to transport has been to move storage facilities together with production. This means that there is no transport between these two joints.

In addition, there are drop shipping solutions for over 90% of retailers. This means that the only real product transport used is when orders are to be delivered directly to the end customer.

It is also a priority to have raw material suppliers from Europe, to keep delivery transport from suppliers to a minimum.

Sales

In recent years, TRIMM Copenhagen has undergone rapid development, with more and more of our activities taking place online. This has meant that TRIMM Copenhagen has been able to minimize the use of printed material and other physical marketing materials such as signs and flags.

In addition, travel activity is minimized and meetings are held online if possible.

The future

- Move 100% of production to the EU.

- Switch to using 100% recycled fibers for the outdoor collection's textiles.

- The product portfolio is expanded with products that can be flat-packed, without compromising on design and comfort.

- Working to find more sustainable alternatives to all the different parts of the products.

All designs are owned by TRIMM Copenhagen.
